World history or global history as a field of historical study examines history from a global perspective. It emerged centuries ago; leading practitioners have included Voltaire (1694-1778), Hegel (1770-1831), Karl Marx (1818-1883) and Arnold J. Toynbee (1889-1975). The field became much more active (in terms of university teaching, text books, scholarly journals, and academic associations) in the late-20th century.

The history of slavery spans many cultures, nationalities, and religions from ancient times to the present day. However, the social, economic, and legal positions of slaves have differed vastly in different systems of slavery in different times and places. Slavery occurs relatively rarely among hunter-gatherer populations because it develops under conditions of social stratification.

In *A History of the Global Stock Market*, B. Mark Smith weaves an entertaining tale that ranges from medieval trading companies and nineteenth-century robber barons to modern theorists and international speculators. Here, Smith debunks the popular myth that the market is inevitably subject to recurring speculative bubbles and discredits the notion that the current "globalization" of the market is something radically different from what has occurred in the past.

Global history is one attempt to face the challenges posed by these observations, and to overcome the two unfortunate birthmarks of the modern disciplines. It is thus a revisionist approach—even if it builds on a whole series of forerunners, for issues such as migration, colonialism, and trade have long been of concern to historians.
