The vertically-mounted L312 Multi-Level Float Switch is designed to monitor up to five levels on a single device. With only one entry, the L312 can track changing levels within a small tank, as well as monitor liquid interfaces of dissimilar liquids for oil/water separations, chemical emulsions and condensation levels.

Innovative Solutions Float Switch

The F57 Series float level switches provide an economic solution to monitoring the most common liquid level applications in tanks and other vessels. Magnets within the float actuate the sealed reed switch on rising or falling levels. These switches are mounted in the vertical position and are shipped in the normally open position.
