Honda Generators - Owners Manuals - Honda Power Equipment

Manual Generator is a power source that must be manually operated to produce electricity. It is the first power producer unlocked. It requires a duplicant constantly running on it in order to produce electricity. While it is a renewable power source, it reduces a colony's productivity as it produces a relatively small amount of power and prevents a duplicant from doing other jobs.

Generator Transfer Switch Kits at Lowes.com

Generators provide nearly all of the power for electric power grids. The reverse conversion of electrical energy into mechanical energy is done by an electric motor, and motors and generators have many similarities. Many motors can be mechanically driven to generate electricity frequently they make acceptable manual generators.
