I homeschooled my daughter and we are using this to teach the body with health science. She is 4.5 and LOVES this! Every few days we do a part of the body and then follow up with reading a kids book on the part of the body and also looking up a few videos on youtube to explain the function more clearly.

Used this same book over 25 years ago with my homeschooled children. Have read some reviews which indicate the author expected a complete adult anatomy and physiology text. Seriously? This is a good introduction to the body for children. My children loved it and now I have purchased for my daughter to use in teaching her children.

Make a life-size tracing of your child's body outline, then help them learn about various body parts by coloring, cutting, and pasting them onto the outline. This is a fun way to learn about the body for children in grades 1-4. The catalog number is TCM211 which you might need to differentiate it from a similarly titled TCM thematic unit book.
