The next most common step in AC troubleshooting is checking for a dirty air filter. Your AC system is more than just the outdoor unit sitting by the side of your home. Most systems also include an indoor air handler unit, usually a furnace or fan coil. The indoor unit should include an air filter that traps dust, dirt and other airborne particles.

Troubleshoot an Air Conditioner | AC Troubleshooting | Carrier

Room air conditioners are designed with a thermostat sensor (located behind the control panel), which measures the temperature of the air the unit is blowing out. If your unit is not blowing any cold air, the sensor may have been knocked out of its position. This requires a technician to adjust it back to its right place.
