Whale Dichotomous Key Activity Answers - Maharashtra

dichotomous key is a series of questions with two answers, often yes or no. In a whale dichotomous key, a sample question might be whether the whale has baleen. Each answer leads you to another question or to the name of the whale. For this exercise, use several pictures of different whales. Before the lesson, print the pictures and a key. The whale pictures that the students use should not have the name of the whale, as the

IDENTIFYING WHALES: CETACEAN DICHOTOMOUS KEY

A dichotomous key can be used to identify animals, plants, and other organisms and objects. Dichotomous keys work best when they are divided into groups and then further divided into smaller groups. Some dichotomous keys used to identify plants or animals ask yes or no questions. They also rely on looking for clear differences. Questions in the dichotomous key are numbered and answered in order. Procedure 1.

Dichotomous Key Activity - 2010

Dichotomous means divided into two parts. At each identification step in the key, the cetaceans will be separated into two groups—until each whale or dolphin is uniquely identifiable. See Table 6.2 for an example using cars and trucks. Separate the 12 cetacean species that you cut out into two different groups.

Activity: Identifying Cetaceans | manoa.hawaii.edu ...

Once you feel your students have mastered the concept of the dichotomous key, the real fun can begin. Adding a narrative like a fishing trip to their identification and key creation process can make a world of difference in their enthusiasm (and retention). Capping off the unit with a fun art activity will make it even more memorable.

To identify the marine mammals, students should use the dichotomous keys provided: one for cetaceans (whales, dolphins and porpoises) and one for pinnipeds (seals, sea lions and walruses). A dichotomous key is a systematic guide to species identification. First, students should read the two options under number one.

Lesson 20: Vertebrates II National Science

Dichotomous Key Definition. A dichotomous key is a tool created by scientists to help scientists and laypeople identify objects and organisms. Typically, a dichotomous key for identifying a particular type of object consists of a specific series of questions. When one question is answered, the key directs the user as to what question to ask next.
